Portfolio: portfolio-zeta-cyan-13.vercel.app/en

SUMMARY

Front-End Developer with 4 years at one product company, building and maintaining two Shopify apps used by real merchants (Oneloyalty, Swift). Strong in ReactJS and TypeScript: turning Figma designs into UI, connecting REST APIs, handling forms and real-time updates. Comfortable maintaining a large existing codebase for the long term, working with Backend, Designers and QA in Scrum teams, and delivering on schedule. Also built and launched a Shopify app (SafeBulk) as the sole Front-End developer.

SKILLS

- **Core:** ReactJS (18/19), TypeScript, JavaScript (ES6+), HTML5, CSS3, Responsive Design
- **Shopify:** Shopify Embedded Apps, Shopify Polaris, Polaris Viz, App Store "Built for Shopify" requirements
- **State & API:** React Query, Zustand, Redux Toolkit, RESTful APIs (Axios), WebSockets (Pusher)
- **UI & Forms:** Tailwind CSS, SCSS, styled-components, React Hook Form, Formik, Yup, i18next
- **Also used:** Next.js (App Router), Vite, Vitest, Lighthouse / Core Web Vitals
- **Tools:** Git, GitLab CI/CD, Docker, Jira, Confluence, Figma, GitHub Copilot, Claude

WORK EXPERIENCE

FireGroup - Front-End Developer (Fresher to Middle) | 10/2022 - 08/2026

Oneloyalty - Shopify App, Loyalty & Rewards | 06/2024 - 08/2026

Role: Middle Front-End Developer | Team of 9 (2 FE) | apps.shopify.com/oneloyalty
Tech: ReactJS 18, TypeScript, React Query, Zustand, React Hook Form, Yup, Pusher, i18next, Tailwind CSS, Shopify Polaris, Vite

- Built admin screens from Figma designs and connected them to Backend REST APIs with React Query and Zustand.
- Fixed layout shifting on the dashboard (CLS below 0.1), helping the app keep its "Built for Shopify" badge for better App Store ranking.
- Helped merge 2 repositories (Admin, Extensions) into one shared codebase with senior engineers: combined duplicated UI components into a shared library; delivered on schedule.
- Created one shared translation (i18n) setup for the whole team, removing duplicate setup errors.
- Maintained the Front-End deployment pipeline on GitLab CI/CD with DevOps: fixed Node version issues and sped up builds.
- Set up GitHub Copilot for the team with clear rules to keep AI-generated code quality consistent.

Swift - Shopify App, SEO & Speed Optimization | 10/2022 - 06/2024

Role: Fresher - Junior Front-End Developer | Team of 9 (2 FE) | apps.shopify.com/swift
Tech: ReactJS 18, TypeScript, Redux Toolkit, React Query, Formik, Yup, Pusher, i18next, Shopify Polaris, Vite

- Converted the codebase from JavaScript to TypeScript together with senior engineers and applied ESLint rules for consistent code style.
- Built a real-time progress screen (Pusher) for multi-step optimization tasks, showing status and success/failure of each step.
- Reduced initial page load time by about 20% with code splitting and WebP images.

PERSONAL PROJECTS

SafeBulk - Shopify Bulk Product Editor | 07/2026 - Present

Role: Sole Front-End Developer (1 FE, 1 BE) | Tech: ReactJS 19, TypeScript, TanStack Router, React Query, Zustand, Docker

apps.shopify.com/safebulk-editor | github.com/nguyenthanhdat22012001/safe-bulk-shopify | Demo: youtu.be/uaKi8VwIrKE

- Co-founded the product with a Backend engineer: researched the market, wrote feature requirement documents and prototyped the UI.
- Built the whole Front-End alone and launched the MVP on the Shopify App Store in about 1.5 months.
- Built a Bulk Edit Wizard, CSV import/export, change history and plan limits for stores with large product catalogs.

Portfolio Website - Next.js | portfolio-zeta-cyan-13.vercel.app/en

- Bilingual (EN/VI) website with Next.js, TypeScript and next-intl; good SEO, accessibility and Lighthouse scores, with unit tests (Vitest).

EDUCATION

FPT Polytechnic College - Website Design | 09/2020 - 01/2022

College Diploma, graduated with Distinction, GPA 8.1/10

LANGUAGES

English: Good reading of technical documentation
